TRUE MULTI-ZONE CONTROL

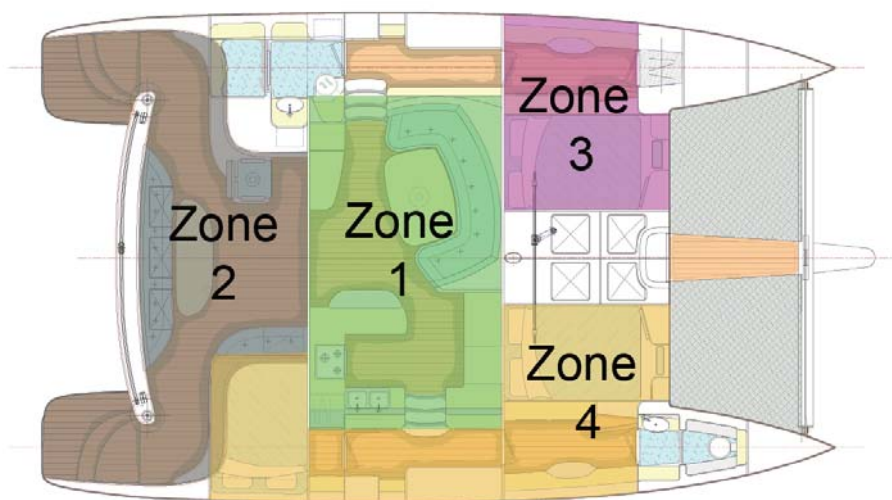

FUSION's Marine Zone Technology allows you to create a truly customised audio solution for your vessel.

Connect up to four wired Remote Controls to a MS-CD500 or MS-IP500 Stereo Unit and create up to four different audio zones in your boat. Each Remote Control provides the ability to adjust the audio settings to a different level in each zone - have loud music in the cockpit and quieter music in the saloon.

The Remote Control provides the same source features available on the Stereo Unit, via a white positive alphanumeric LCD. This allows you to navigate and control the source currently playing on the stereo unit - iPod, CD, Tuner, MP3.

The Layout shown here offers 2 solutions to your sound requirements, suggestion 1 offers an economical, and slightly more simple solution, while Layout 2 will satisfy the most ardent music buff and the younger ones.

Suggestion 1:

ZONE 1

- Marine Stereo Unit MS-CD500
- Marine External iPod Dock MS-iPODOCK
- 6" Speakers MS-FR602

ZONE 2

- 6" Speakers MS-FR602
- Wired Remote Control MS-WR100

Suggestion 2:

ZONE 1

- Marine Stereo Unit MS-IP500
- 7" Speakers MS-FR702
- Marine Amplifier FM-402
- Marine Subwoofer FWM-10

ZONE 3

- 6" Speakers MS-FR602
- Wired Remote Control MS-WR100
- Zone Amplifier

ZONE 2

- 6" Speakers MS-FR602
- Wired Remote Control MS-WR100

ZONE 4

- 6" Speakers MS-FR602
- Wired Remote Control MS-WR100
