

"La Passion" by Fusion

"The Passion to involve your creative senses"

"Easy Tiger" and "Blonde Moment" are just two examples of the magnificent craft that can be produced by "Husband and Wife" teams, working either spare, part or full-time. The benefits are numerous with "LaPassion", this beautiful production moulded Kit of components can be assembled by handy people with no prior boat building experience, just by following the simple steps laid out for you. Customization of the interior can be a simple task using the many interior templates available.

Remember "LaPassion" can be delivered in two shipping containers, anywhere in the world.

The following pages outline specifications and the Kit contents.

LaPassion

KIT SPECIFICATIONS

"It's impossible to describe the feeling and excitement when removing those beautiful, white, glossy components from their shipping containers." -- Greg, Aust.

The LaPassion Kit Set was designed on computer by Gary Lidgard design studios, the moulds were then routed on a 5 axis router from those files, this ensured the accuracy of components was achieved.

With 50 of these boats sailing and under construction, the process has been well and truly proven. Not only does the construction process reduce months from construction time, it allows shipping in containers around the world at a very reasonable cost.

Technical Specifications (Standard vessel)

LOA	12.2mts	40ft
BOA	7.2 mts	23'4"
DRAFT	.8mt	32"
BRIDGEDECK	800mm	32"
RIG HEIGHT	17.26mts	57.4"
FUEL	380lts	100 gals
WATER	800lts	212 gals
MAINSAIL	64sqmts	688 sq ft
JIB	24.5sqmts	264 sq ft
SCREECHER	60sqmts	645 sq ft
SPINNAKER	82sqmts	883 sq ft
ENGINES	2 x YM30 Yanmars	
SHIPPING	2 x 40ft containers	

Whether you decide to hire the Fusion assembly team to help you, or you decide to just follow the simple instructions, “LaPassion” by Fusion is a dream to build and a dream to sail.

Check out an owner’s web site by going to: www.cruisingnorth.com.au

When making the decision, “which Kit”, there are a number of check points that must be considered.

The first being resale value:

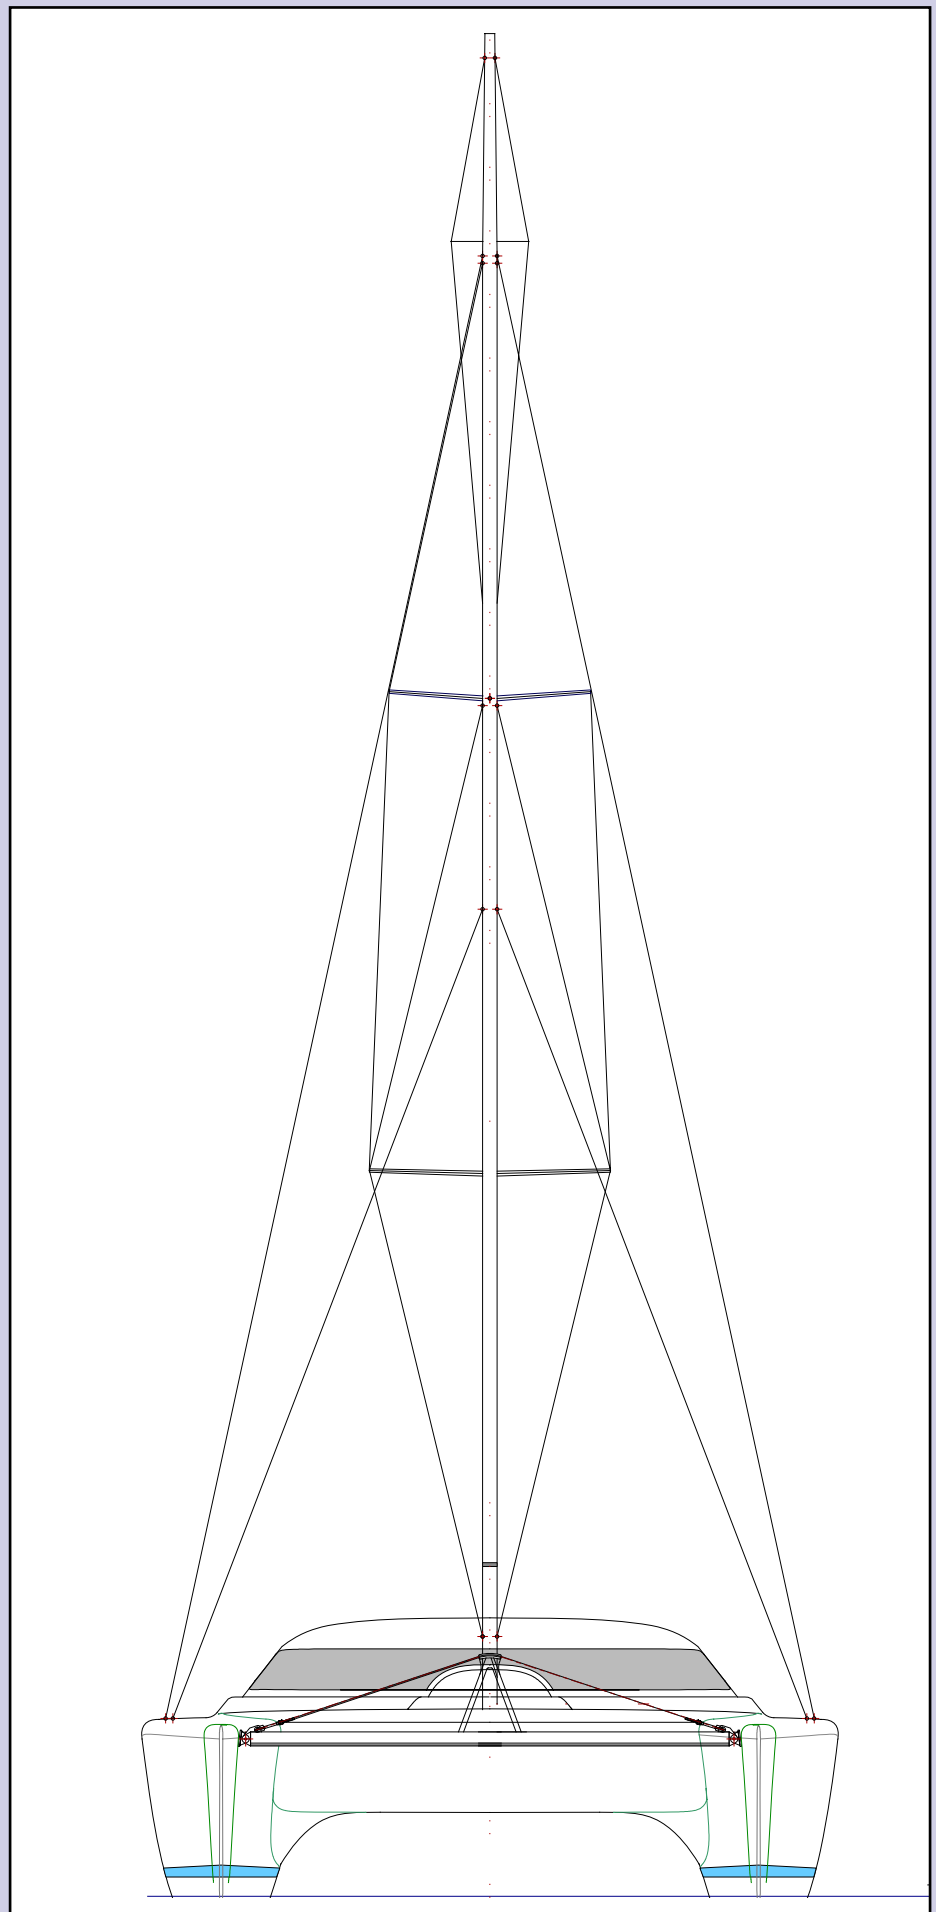

1. What will the real market value be when finished?
2. Is it a modern, performance design?
3. Is it moulded Gelcoat and Fibreglass construction?

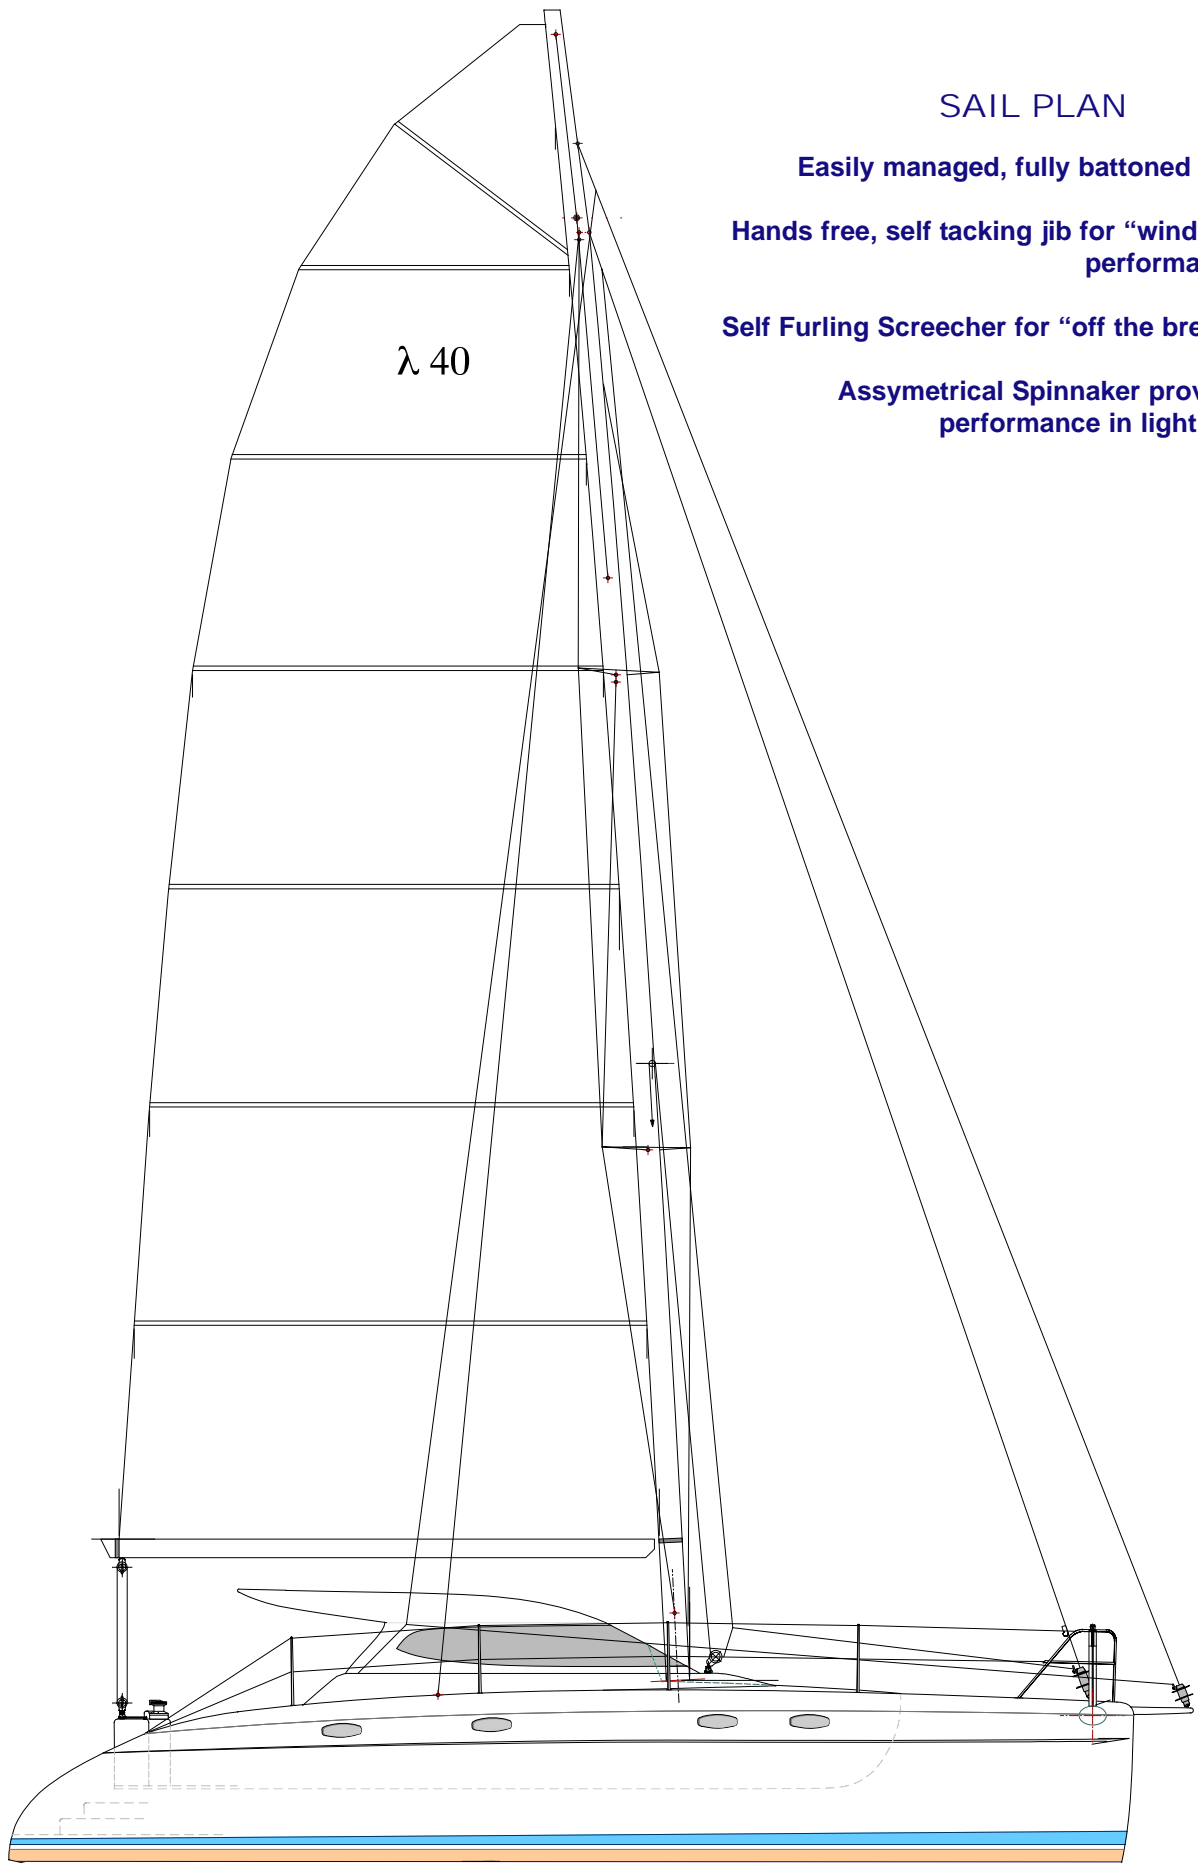

The second being your families comfort and safety:

4. Compare bridgedeck heights
5. Check access into hulls.
6. Check head heights throughout the hulls
7. Do standard Queen sized mattresses fit?
8. Can I sit up in bed?
9. Is 8 portlights and 8 hatches enough ventilation.
10. Do my building components carry a “Class A” Oceangoing, CE Certification?

The third, “Is it a user friendly vessel”?

11. Check the plans for dinghy access.
12. Does it have flat easy workable decks.
13. How much drop has the anchor chain.
14. Is the chain run below decks, with self deploying anchor.
15. Does it have diesel motors
16. Do you have access to engines without wakening the boat.
17. Do you have options on mini keels and centre boards
18. Sensible sail plan.

SAIL PLAN

Easily managed, fully battened Main

Hands free, self tacking jib for "windward performance"

Self Furling Screacher for "off the breeze"

Assymetrical Spinnaker provides performance in light airs.
