

Sanctuary Cove Boat Show

Sanctuary Cove Boat Show must rate as one of the best in the world. **Below** the Fusions prepare for berthing; The Power cat: Our attractive Fusion Model; Shoes; **Right** Derrick Kelsall chats with fusion owner Andrew Pounder and **Bottom R.** Jason Gard answers questions.

POWER to Fusion

LA PASSION
KIT CATAMARANS

Sanctuary Cove also saw the release of the long awaited Fusion 40 Power cat. Long queues of interested clients, (many coming back two and three times) gave the definite thumbs up on this fabulous vessel. The Yanmar BY series diesels deliver 22 to 32 knots, with very impressive fuel consumption figures, and low wash this will be important factors as more regulations come into force. aware

Moulded steps are now available from Yachting Siam

Up from Sydney

LA PASSION
KIT CATAMARANS

We must thank Kaye and Greg White, the Sydney Fusion Agents, for not only taking the time, away from their business, but allowing us to use their beautiful Fusion 40 "Kalani" at the Show. These pictures show the attention to detail and the quality of craftsmanship that demanded the attention of showgoers.

Furniture components or flat panels are now available

Launchings

“Cruis’n Hues”

Tim and Colleen Hues’ beautiful Fusion 40 was launched at the Abel Point Marina in Queensland recently. Johnny Warren once again organised a perfect touchdown. The rig has now been fitted and the UK Hyde sails go on this week. Tim can’t wait to see his sailing dream come true. More pics appear on the “Gallery”.

ELECTRIC

At Fusion we certainly are thinking outside the box when it comes to future possibilities. We also invite any of our hundreds of readers to contribute any of your great ideas for helping create a “greener”, more environmentally friendly craft.

Talking of Electricity on the water, I thought these pics taken at Hamilton Island were good enough to publish in the Newsletter:

Next issue Fusion launchess 1st Diesel Electric Hybrid

Report from Yachting Siam

LA PASSION
KIT CATAMARANS

Peter Plant of Thailand Agent, Yachting Siam, sent these pics of the line of Fusions in their assembly facility near Kosamui.

Below: Australian Lance Reynolds, inspects his new Fusion 40 under construction, and as can be seen, Lance was all smiles at the great work being done by this progressive company.

SEEN AT SHOW

Generators

Smaller, lighter and significantly quieter than traditional generators, the WhisperGen™ heat and power system is your quiet, diligent first mate monitoring battery charge and heat levels, utilising a built-in self-diagnostic system so that you can set it and forget it.

The DC WhisperGen™ heat and power system is a uniquely quiet, independent power generation and heating system adapted for the marine sector, mobile, and remote home environments. It provides power to automatically charge batteries that run all of the onboard / remote applications anytime. It automatically provides hot water and also heat for a warm and dry living environment inside.

The DC WhisperGen™ is designed to be used as an electricity generator that also produces heat. The system is designed to charge batteries such as those used to provide electricity in remote homes, boats or other mobile applications.

The WhisperGen™ will provide more than enough electricity and heat to satisfy the requirements of an average boat, providing both electricity and heating with minimal noise and extremely low exhaust emissions.
