

Record Boat Show Sales

It was obvious within the first hour that Fusion was something special, parked amidst the multihull flagships from all over the world, the lineup of interested parties wishing to view the boat was staggering. People were actually being asked to please come back later.

We couldn't count the couples that came back onboard two and three times and those that came back the next day with their wives and families. Also it was the 1st show where a deposit was paid in the first 30 minutes, thanks to Peter Firkins and his son.

Greg and Kaye have done a magnificent job of fitting out "Kalani" and when consistently told "this is definitely the best boat at the show", helped make the effort worthwhile.

LAUNCHINGS

"Fayze Too II"

Built by: Fusion Cats WA,
Owners: Fud and Faye Mackenzie

Wednesday July 9th was a proud day for owners Fud and Faye Mackenzie as they saw their Fusion 40 slip into the Indian Ocean. The launch date looked set to clash with some anti social winter weather however it held off long enough for the drive from the factory to the boat lifters, the mast to be stepped, and of course some champagne to flow across the bows! 'Fayze Too II' has been fully equipped and is ready to set sail for an Australian circumnavigation but not before some long awaited play time on the west coast with friends and family. Assembly and fit out was undertaken by Fusion's West Australian agent and assembler, Fusion Cats W.A., and the Mackenzie's are absolutely delighted with the results.

..... Bon Voyage Fud and Faye!.

LAUNCHINGS

"Eylandtime"

**Assembled by Fusion Mackay
Fitout by Chris Driver Marine
Owners Brent and Jeananne Woods, NT**

Champagne Awards go to the determination of this N.T. couple, travelling to and from Darwin to Mackay and Proserpine to watch over their beautiful Fusion 40 called "Eylandtime" as it was assembled in Mackay and then transported 127kms down the freeway to Proserpine where it was fitted out. Then came 50kms to Bowen where it was set down on the sand and waited for the tide to lift her.

Last heard of at
Lizard Island, Queensland

Big Tides in Bowen, Qld.

NEW PRODUCTS

There are many choices these days in Trampoline materials and this is another new one well worth a look. It is marketed by Tex Connex in Blackburn, Victoria. Contact details: Robert Cahill email: texconnx@bigpond.net.au where samples are available.

For a PDF file Brochure email me at Fusion.

You want extra power but don't want a generator, then maybe this is the answer for you.

Yachtwork is a progressive New Zealand company and has recently finished their latest design in dual alternator mounts. They now produce a forward facing large frame mount that direct couples to the Yanmar engines. See the picture below.

Think Big . . .

Fusion's always planning for the future and one concern was how do we fill the demand, well this container ship will help, with Asia to US in 4 days at an average of 30 knots. Larger than a US aircraft carrier, a beam in excess of 200ft and totally run by a crew of just 13.

Check out pic 2, that's an 80ft Ketch at the rudder.

Have you checked the new web site??
