# MERRY CHRISTMAS

from all at Fusion Catamarans

May the New Year bring you all the Joy and Happiness possible.

So much for the doom and gloom that was predicted for 2010, it has now proven to be the best year on record for purchasing a Fusion Catamaran, no matter whether it was a Kit or a finished vessel.

Orders are now out to June 2011, which is another healthy sign of the times, and as I check the conversion rates, I notice the Kit price is at an unbelievably low \$125,000 (that's \$20,000 less than in 2004).

The year has been great in many other areas also, such as the number of new launches and also the number of new Agents that have come onboard in Asia and the Pacific.

**Put yourself in the picture now, why wait**

Inside we will show you the Fusion we have nominated as Top Boat 2010.

# Last Touches

Down in a country town in Central Victoria, a Fusion Power Cat has quietly been assembled. We know the quietness will be broken once the boat is launched as this Fusion Power cat is running the largest of the Yanmar BY series motors, the twin 280s and will push heaps of water via the German made Fan Props.

This particular Cat also has an extended bridgedeck, which again shows the versatility of this design.

In the future keep an eye open for a sports version of the Fusion Power Cat.

# TOP BOAT 2010

## SONRA

It takes real artists to create a genuine "work of art" and in this case the artists were none other than Kate and Lloyd Powell of the Cat Factory in WA.

Kate and Lloyd have been the WA Agents of Fusion Catamarans since 2006 and have managed to continually surprise us with their craftsmanship and intelligent ideas.

Visitors to the Mandurah Boat Show each year, have been privileged to see the examples of their fine work.

Congratulations Kate and Lloyd, well done.

We will let the images on the following page speak for them selves.

**SONRA**

I always wondered why some people place their Radar on a seperate pole and not on the Mast?

## NEW PRODUCTS

Each month we endeavour to highlight new product from suppliers or we revisit items which we believe warrant a second showing for new subscribers. No 1 is an in deck padeye from Wychard 2, I think is worth considering on those extended cockpit roofs. 3 BLA have a new Catalogue out now. 4-10 are from Fabtex Ind. and 11 is the latest Kit Boat Book available.

MESSAGE FROM MASTERVOLT Hello Everyone,

Please find below links to the new 2011 Mastervolt Power-book catalogues.

This year Mastervolt have split the catalogue in two, 1 x products catalogue & 1 x systems catalogue.

The catalogues are viewable online or available as a PDF download.

If you would like to see a Fusion assembly then search YouTube "Fusion 40 Assembly"

For anyone that loves to play with new technology, have a look at this. More stuff for the iPad, but now its seriously professional. My son is currently running from Newport RI, past Bermuda to St. Maarten in the Carribean, he has paper charts, but is using this linked to his sat phone for data and has all the weather and routing information on his iPad. He said it works like a dream. CHECK IT OUT
